

Capstone Project Charter

Project Name: LifeProgreX
Capstone Clark University

1. Project Overview

LifeProgreX is an advanced personal growth platform that combines health data analytics with generative AI coaching. The project focuses on creating a holistic "Life Resume" for users to track their development over time.

2. Core Objectives

- Deliver a cross-platform mobile app using Flutter.
- Integrate real-time health data (Steps, Sleep, Workouts) via HealthKit.
- Implement "Max," an AI coach powered by Google Gemini.
- Establish a secure Firebase backend for user data and authentication.

3. Project Deliverables

Objective	Deliverable	Description
Habit Engine	Core Tracking Module	Handles daily logs and streaks.
Health Sync	Integration Service	Maps Apple Health data to app metrics.
AI Interface	Gemini AI Coach	Generative chat for personalized insights.

4. Risk Management

Risk	Prob.	Impact	Mitigation
API Limits	M	H	Implement data caching.
Privacy	L	H	Firebase Security Rules.
Sync Errors	M	M	Retry logic and local storage.

5. Project Organization

Role	Name	Responsibilities
PM / Architect	Satya Pranav Nagunoori	Overall system design.
Frontend Lead	Naga Sai Donthi	UI/UX and Flutter development.
QA / Integration	Bhanu Sai Priya Gomasani	Testing and HealthKit sync.

6. Technical Features

- Flutter Framework (iOS & Android)
- Firebase Auth & Firestore
- Google Generative AI (Gemini SDK)
- HealthKit / Google Fit Integration
